SUMMARY

Frontend Developer (25) — BSc Mechanical Power, Ain Shams (2019-2024, GPA 2.85). Build clean, fast, responsive UIs with React, Next.js, Material UI, Tailwind. Engineering problem-solving mindset: thermodynamics, fluid mechanics, analytical thinking applied to frontend. Targeting frontend roles in software companies. Cairo, available immediately.

FRONTEND SKILLS

React.js | Next.js 14 (App Router) | Material UI (MUI) | JavaScript ES6+ | HTML5 / CSS3 | Tailwind CSS | Framer Motion | Context API / REST API | Git / GitHub | Responsive Design | PSD to HTML | Clean Code | Problem Solving

FRONTEND PROJECTS — Live Demo & Code

E-Commerce Store — React / Featured | [Live Demo](#) | [Code](#)

Full e-commerce with cart, wishlist, categories, product filtering, responsive, animations with Framer Motion. State management Context API, modern UI. Deployed on Vercel.

Admin Dashboard Panel — 8 Pages | [Live Demo](#) | [Code](#)

Complete admin dashboard: dashboard, projects, courses, files, friends, plans, profile, settings. Statistics, tasks, file manager, modern UI. Ideal showcase for MUI DataGrid & Tables.

SaaS Landing — Next.js 14 | [Live Demo](#) | [Code](#)

Modern SaaS startup landing page built with Next.js 14 App Router, responsive design, animations. Ready to integrate MUI components, optimized for performance.

Leon - Creative Agency Landing | [Live Demo](#) | [Code](#)

Creative agency landing page - First work converting PSD to responsive website with clean, semantic HTML/CSS/JS. Foundation for frontend journey.

Old Portfolio — 7 Projects Archive | [Live Demo](#) | [Code](#)

Archive shows evolution from simple HTML/CSS to React: Template_1 to 5, Dashboard, Next.js. 7 templates as practice for PSD to HTML and responsive design.

BACKGROUND — MECHANICAL POWER ENGINEER

Education: BSc Mechanical Power Engineering — Faculty of Engineering, Ain Shams University (2019-2024) — GPA 2.85 — Cairo, Egypt — Thermodynamics, Fluid Mechanics, Heat Transfer, HVAC, Machine Design, Manufacturing.

Internships: National Authority for Tunnels (Aug-Sep 2022) — HVAC, ventilation, pumping, fire protection in metro/tunnel infrastructure | Arab Contractors (Aug 2023) — Otto & Diesel cycles, IC engines, thermodynamic performance analysis

Technical: AutoCAD (2D), Inventor (3D), ANSYS (FEA), MATLAB, Thermo, Fluid, HVAC, Problem Solving, Clean System Design

Graduation Projects: Pitch System Control (2021-22) — Feedback control, modeling & simulation | Solar Cell Cooling System (2023-24) — Designed cooling for PV panels to enhance efficiency, applied heat transfer & thermodynamics optimization
