SUMMARY

Frontend Developer (25) — BSc Mechanical Power, Ain Shams (2019-2024, GPA 2.85). Building clean, fast, responsive UIs with React, Next.js, Material UI, Tailwind CSS, Framer Motion. Applying engineering problem-solving mindset — thermodynamics, fluid mechanics, analytical thinking, clean system design — to frontend development. Strong focus on responsive design, PSD to HTML conversion, modern UI/UX. Targeting frontend roles in software companies. Available immediately in Cairo.

FRONTEND SKILLS

React.js | Next.js (App Router, Server Components) | Material UI (MUI) | JavaScript ES6+ | HTML5 / CSS3 | Tailwind CSS | Framer Motion | Context API / REST API | Git / GitHub / Vercel | Responsive Design | PSD to HTML | Clean Code | Problem Solving

FRONTEND PROJECTS — Live Demo & Code

E-Commerce Store — React / Featured | [Live Demo](#) | [Code](#)

Full-featured e-commerce built with React, Context API for state management, Framer Motion for animations. Implemented cart functionality, wishlist, product categories, filtering & search, product details page, responsive product grid, checkout flow UI, user-friendly navigation. Focused on clean UI, fast performance, mobile-first responsive design, reusable components, smooth animations. Deployed on Vercel with optimized images and code splitting. Stack: React, Context API, React Router, Framer Motion, Responsive Design.

Admin Dashboard Panel — 8 Pages | [Live Demo](#) | [Code](#)

Complete admin dashboard with 8 pages: dashboard overview, projects management, courses, files manager, friends list, pricing plans, profile, settings. Features statistics cards, progress tracking, task management, file upload UI, file type filtering, user interactions, data tables. Built with semantic HTML5, modern CSS3 (Flexbox, Grid), vanilla JavaScript. Ideal showcase for integrating MUI DataGrid, Tables, Charts. Fully responsive, clean code architecture, component-based structure.

SaaS Landing — Next.js | [Live Demo](#) | [Code](#)

Modern SaaS startup landing page built with Next.js App Router, React 19. Features hero section, features showcase, pricing tables, testimonials, FAQ, CTA sections, footer with responsive navigation. Implemented SEO-friendly structure, App Router routing, server components, responsive design, smooth scroll animations. Ready to integrate MUI components, Stripe, authentication. Demonstrates modern Next.js best practices, Vercel deployment.

Leon — Creative Agency Landing | [Live Demo](#) | [Code](#)

Creative agency landing — First professional work converting PSD to fully responsive website with clean, semantic HTML5/CSS3/JS. Features landing hero, services, portfolio, about, contact sections, responsive navigation, mobile menu, smooth scrolling. Learned PSD to HTML workflow, pixel-perfect conversion, clean CSS architecture (BEM), performance optimization. Foundation for frontend journey.

Portfolio Collection — 7 Projects Archive | [Live Demo](#) | [Code](#)

Archive showcasing evolution from HTML/CSS to React: Template_1 to Template_5 (5 landing pages with different designs), Dashboard Template, Next.js Template. Each project focuses on different skills: Template_2 modern UI, Template_3 advanced responsive, Template_4 animations, Template_5 final HTML/CSS mastery before React. Demonstrates growth, consistent practice of PSD to HTML, responsive design, clean code. All deployed on GitHub Pages.

BACKGROUND — MECHANICAL POWER ENGINEER

Education: BSc Mechanical Power — Ain Shams (2019-2024) — GPA 2.85 — Thermodynamics, Fluid Mechanics, Heat Transfer, HVAC, Machine Design. Technical: AutoCAD (2D), Inventor (3D), ANSYS (FEA), MATLAB, Problem Solving, Clean System Design. Internships: National Authority for Tunnels (Aug-Sep 2022) — HVAC, ventilation, pumping, fire protection. Arab Contractors (Aug 2023) — Otto & Diesel cycles, IC engines, thermodynamic analysis. Grad Projects: Pitch System Control (2021-22) — Feedback control, MATLAB/Simulink. Solar Cell Cooling System (2023-24) — Designed cooling for PV panels to enhance efficiency 15%, heat transfer optimization.
